Smart Contract Audit

The XBTCR smart contract has been deployed on the Binance Smart Chain and verified on BscScan. A third-party audit will be considered to further strengthen community trust and long-term reliability. The contract has no hidden minting or ownership privileges, and the team has renounced ownership to ensure decentralization.

Audit Summary

Ownership has been renounced, and contract verification has been completed on BscScan. The code structure follows industry standards. No critical vulnerabilities were found in internal reviews. Future audits from top firms like CertiK or SolidProof may be added.
